Product description:

HONDA TENDER T35 AE3

Honda Inflatable Dinghy T35 AE3 is an aluminium dinghy that can be equipped with a Honda engine; this dinghy can be combined with an outboard for a maximum power of 20 hp.
The T35 AE3 dinghy is a portable, lightweight dinghy and is perfect for coastal exploration, fishing or simply offshore excursions. With a new bow roller design, a high quality durable PVC body and larger diameter tubulars for smoother sailing, the new Honwave dinghy range is perfect for trips to the lake or sea.
With a Honda marine engine, it will be even easier to go to sea with the T35 AE3 tender. This is because the dinghy's larger diameter tubes provide excellent buoyancy and stability.

Honda offers different types of inflatable boats and tenders and each of them has a different length and is suitable for different outboards and number of passengers. For example the Honda T35 AE3 dinghy has an overall length of 353 cm and can carry up to 5 adults with 3 compartments inside plus the strap. If you take your fun a little more seriously, this inflatable boat with aluminium deck is a super tough option. Suitable for all boating needs, its oversized load-bearing tubes have a hydrostatic thrust that makes cruising even easier.
Honda inflatable boats are designed to withstand whatever they may encounter on the open sea. This applies to all types of weather and sea, in fact even the Honda T35 AE3 inflatable boat is protected against everything. The Honda T35 AE3 inflatable boat is made of high-quality European PVC - simply the best available - which makes this dinghy not only durable but also lightweight.
In addition to being made of European PVC, Honda inflatable boats and tenders also have a thick planking around the entire boat. This not only acts as a bumper to protect the hoses from puncturing, but its curved shape deflects water jets.

Key technical specifications of the Honda T35 AE3 inflatable boat:
Total length: 3530 mm
Maximum beam: 1710 mm

Internal Length: 2440 mm
Internal beam: 800 mm
