

GENERAC ARCTIC KIT

Product price:

874,00 € tax excluded

Product description:

GENERAC ARCTIC KIT

Product purchasable only in conjunction with a Generac product

The Arctic kit adaptations include an internal thermostat that activates when temperatures fall below the specified range. With a simple switch, you can turn on the heating cables and prevent the water sprayed in the pipes and on the nozzles from freezing during storage and operation. The electric motor and pumps are also certified to operate at minimum temperatures.

Images and technical data are not binding and may be subject to revision by the manufacturer.
