## Product description:

### **GENMAC Whisper-GAS G12000KS-M5 NG THREE-PHASE GENERATOR 11,0KVA**

The generator Genmac Whisper-GAS G12000KS-M5 NG three-phase is equipped with a Kohler engine powered by methane gas capable of delivering a power of 11,0KVA with capacitor voltage regulator (AVR optional).

Genmac silenced professional high quality natural generator with 11,0KVA power produced. Genmac is equipped with an oversized air-cooled Kohler engine.

Genmac professional methane generators are highly reliable machines, built with quality components to be used in the professional field, where reliability is fundamental.

This feature is fundamental to guarantee a high reliability of the generator, reduces its effort and increases its life span by lowering the noise level.

All Kohler engines are built using the best materials, the most innovative techniques and the most advanced methods for quality control.

Each engine is thoroughly tested in order to prove its perfect functioning before delivery.

In case of need, Kohler assistance service is always at your disposal.

The 11,0KVA generator is equipped with a capacitor voltage regulator, on request it can be supplied with the AVR regulator.

## **AVR Voltage Regulator**

All Genmac series models are available with optional AVR voltage regulator. The AVR is a device that allows to keep the output more constant and less dependent on the load. Thanks to this card you have fewer drops or current peaks and this makes it safer to use the various devices connected, improving performance and durability.

The model equipped with AVR board is highly recommended, as it guarantees a significant improvement in the stability of the output; this feature makes the generators particularly suitable

for common use machines with reactive load such as refrigerators, freezers, air conditioners and garden machines. Thanks to the AVR you will enjoy greater stability and therefore an increase in the life of your devices.
