

GENMAC GR1250IN SINGLE-PHASE GENERATOR 1.1 kW INVERTER

Product price:

315,00 € tax excluded

Product description:

GENMAC GR1250IN SINGLE-PHASE GENERATOR 1.1 kW INVERTER

The Genmac GR1250IN single-phase generator is equipped with a 4-stroke R60I engine, powered by gasoline, capable of delivering a maximum power of 1.1KW, super quiet thanks to the inverter provided.

The Genmac GR1250IN is particularly compact and light, it can be transported by hand, with extreme ease in any place; This feature is very appreciated by those customers who deal with the sale of products in the squares, streets or markets and that for reasons of lack or remoteness of parking for their cars, must carry the generator by hand for considerable distances (old town, remote areas, etc.).

The GENMAC GR1250IN has an internal tank for the fuel with capacity of 2,6 lt, guarantees an autonomy of about 3,5 h. The small size and the strong handle located above the body of the machine, make it perfect for transport and easy placement during periods of inactivity. All materials used for the manufacture of Genmac GR1250IN, are of first choice, offering and guaranteeing the customer a tested and proven product at a very affordable price. Precisely for this reason, it is a very popular tool for professionals and DIY enthusiasts.

Thanks to the electrical stabilizer of the Inverter technology that works at very low distortion, the generator delivers constant current loads without voltage spikes that could damage electrical and electronic devices.

Another advantage of the inverter is to work with variable engine speed, according to the need for current to be delivered, optimizing the best fuel consumption, gas emission and wear of mechanical parts. This product is ideal for use in campsites, campers and for outdoor leisure time.

Thanks to the low noise impact obtained thanks to the inverter, it is possible to use the GENMAC GR1250IN even in environments where particularly loud noises can not be accepted, such as historic centers, hospitals, schools, gyms, etc.. Do not underestimate the considerable discomfort that you feel, to be all day near the noisy generators for work needs.

TECHNICAL FEATURES GENMAC GR1250IN:

Phase Type: Single Phase

Nominal Power: 1.0 kW

Maximum Power: 1.1 kW

Frequency: 50Hz

Nominal Voltage: 230V

Voltage Regulator: Inverter

Motor: R60I 4-stroke

Revolutions: 3000 rpm

Number of cylinders: 1

Displacement: 60 ml

Start: Manual

Fuel: Gasoline

Tank capacity: 2.6 L

Autonomy: 3.5 h

Noise: 65 dBA @ 7m.

Length: 380 mm

Width: 240 mm

Height: 420 mm

Weight: 14 kg

Are you looking for a generator with different technical characteristics? Here you can find the full range of GENMAC generators or other specialized brands

Images and technical data are not binding and may be subject to revisions.

Product features:

Phase: Single phase

Maximum power single phase (KW): 1

Continuous power single phase (KW): 1.1

Fuel: Gasoline

Frequency (Hz): 50

Voltage (V): 230

Sockets configuration: 1 Shucko + Thermal

Engine: 4 stroke

Engine rpm (rpm): 3000

Ignition: Recoil
Starting system: Manual
Number cylinders: 1
Cooling: Air
Alternator: Synchronous
Fuel tank capacity (L): 2.6
Running time (h): 3.5
Acoustic pressure: 65 dB(A) at 7 m
Length (mm): 380
Width (mm): 240
Height (mm): 420
Dry weight (Kg): 14
Silenced: Yes
Super silenced: Yes
ATS Switch device : No
Voltage regulator: Inverter
