SCHENKER MODULAR 30 DIGITAL WATERMAKER 30LT/H

SCHENKER MODULAR 30 DIGITAL is a watermaker equipped with a two 2.5" x 21" membrane which can deliver 30 l/h of osmosis water.

Compactness and wide range of capacities allow to satisfy all needs. Electricity consumption is up to 80% lower than traditional systems. For example to produce 30 liters/hour of fresh water only 100 W are needed. The use of the SCHENKER MODULAR 30 DIGITAL is extremely simple, as no regulation is required. In fact, all systems are equipped with automatic pressure regulation. No direct access to the watermaker is required. All functions are performed remotely via the remote panel.

SCHENKER MODULAR 30 DIGITAL systems use the new patented ENERGY RECOVERY SYSTEM, which amplifies the pressure provided by low-pressure pumps, as an alternative to the high-pressure pumps of conventional systems, allowing for extremely high energy efficiency. The typical power consumption of a SCHENKER MODULAR 30 DIGITAL is only 4 Watth/liter.
