

TESSARI ERLE ENW250 THREE-PHASE SILENCED ELECTRIC POWER GENERATOR 275KVA

Product description:

TESSARI ERLE ENW250 THREE-PHASE SILENCED ELECTRIC POWER GENERATOR 275KVA

TESSARI ERLE ENW250 is a three-phase generating set equipped with a Scania DC09 072A/02-11 engine powered by diesel, capable of delivering a maximum power of 275KVA, complete with voltage regulator **AVR**.

The TESSARI ERLE ENW250 generating set is equipped with a soundproof cabin, capable of reducing the acoustic emission up to 70 dBA perceived at a distance of 7 meters. This feature allows the TESSARI ERLE ENW250 to be considered **Super Silent**

The voltage regulator included with the TESSARI ERLE ENW250 is an electronic device that automatically regulates the voltage and possibly the frequency and/or the electric current according to set values. These values can be modified or bound to the technical characteristics of the regulator itself.

Basically, thanks to an AVR the alternating current (with frequency and voltage variable over time) coming from the alternator is regulated and transformed into direct current at constant voltage
