TF NM 5.5 are lighting towers without a built-in generating set, ideal for direct connection to the grid or for those who have their own generator.

Indeed, the frame is set up to be coupled with single-phase generating sets from 4 to 7 kVA.

The different types of bulbs available ensure great versatility of use in any working environment.

Thanks to their contained weight and set-up on a manual trailer, they can be easily controlled by a single operator.

Sectors of use: rental, events, roadworks and construction sites.
