## **Product description:**

# GREEN POWER GP 4000XM/KM SINGLE PHASE GENERATOR STAGEV 3,9KVA

The Generator GREEN POWER GP 4000XM/KM single-phase is equipped with a KOHLER CH 270 **StageV** engine supplied by gasoline, and comes complete with capacitor voltage regulator (**AVR optional**).

GREEN POWER GP 4000XM/KM is equipped with manual recoil start with self-winding and has a low fuel consumption, in fact it consumes only 1,2 liter/hour at 75% load for a range of up to 3.4 hours of operation. Extremely practical sockets and controls facilitate the start-up and operation of the generator making these operations extremely simple and fast.

The generator is compact and convenient to maneuver and transport thanks to its compact size, its weight of 48 kg as well as the practical tubular handles.

The GREEN POWER GP 4000XM/KM generator features an engine support system with a durable steel frame and rubber shock absorbers.

### STAGEV EMISSION STANDARDS

The STAGEV standard defines guidelines and limits for engine gas emissions. The regulation is respected through the installation of special anti-particulate filters in the gensets, but an indispensable condition for the filter to work correctly is that the genset works at its design temperature.
