Product description:

GREEN POWER GP 8000XM/KE SINGLE-PHASE GENERATOR STAGEV 7,7KVA

The generator GREENPOWER GP 8000XM/KE single-phase is equipped with a KOHLER CH 440 **StageV** gasoline-supplied engine, and is complete with capacitor voltage regulator (**AVR optional**).

GREENPOWER GP 8000XM/KE is equipped with electric start and has a low fuel consumption, in fact it consumes only 2.3 liters/hour at 75% load for a range of up to 3 hours of operation. Extremely practical sockets and controls make starting and operating the generator easy and quick.

The generator is compact and convenient to maneuver and transport thanks to its compact size, its weight of 96 kg as well as the practical tubular handles. In addition, it is equipped with a practical and convenient start system, so that it can be put into operation quickly and easily.

The GREENPOWER GP 8000XM/KE generator is equipped with KOHLER CH 440 StageV engine that allows this machine to deliver a maximum single-phase power of 7.7KVA.

STAGEV EMISSION STANDARD

The acronym STAGEV defines the guidelines and limits of gas emissions from engines. The regulation is respected through the installation of special anti-particulate filters in the gensets, but an indispensable condition for the filter to function correctly is that the genset works at its design temperature.

The electrical control panel of the GREENPOWER GP 8000XM/KE generator is composed of:

- Output sockets: 1x 230V 32A CEE / 1x 230V 16A SCHUKO
- Thermal circuit breaker
- Voltmeter
