Product description:

TRUMA COMBI D6E INETX 6 KW DIESEL / ELECTRIC HEATER FOR CAMPER AND TRUCK

TRUMA COMBI D6E INETX is a diesel and electric powered heater suitable for warm up trucks and campers, capable of delivering a maximum heat output of 6KW.

The powerful Truma Combi D6E heats up even the largest motorhomes in no time. The device also has an integrated 10-liter water tank that can be warm up if necessary.

No additional boilers are needed, thus saving weight and space. The Truma Combi D6E heater is also extremely compact and can therefore be installed in the vehicle with great flexibility.

Depending on the necessary power requirement, you can choose between diesel, electric or mixed operation: in intermediate seasons, electric operation is sufficient, while on cold days it is advisable to choose diesel; and when it is really cold you can set mixed operation. Four outlets ensure the best distribution of hot air inside the vehicle.

When camping, just set the electric operation and the warm up will work with the 12 V power supply without burdening the on-board battery.

The TRUMA COMBI D6E INETX is equipped with the iNet X control panel which allows you to have centralized control of the heater by smartphone. Thanks to the iNet X control panel you can remotely set the optimal temperature of your passenger compartment in a simple and fast way, thanks to a simple and intuitive interface.

TECNICAL DATA TRUMA HEATER STOVE COMBI D6E INETX:

Power supply: Diesel + electric

Nominal heat output Diesel: 2000 W / 4000 W / 6000 W

Nominal electrical heat output: 900 W / 1800 W

Nominal mixed heat output: max. 5800 W

Efficiency: 90%

Water capacity: 10 l

Heating time of the water tank: 20 min

Power consumption in heating and hot water:

- 12 V: 1.8 - 7 A

- 230 V: 3.9 - 7.8 A

Diesel consumption: 220 - 630 ml / h, 110 ml / h with

Length: 525 mm

Width: 450 mm

Height: 300 mm

Net weight: 16.9 kg

Product features:

Phase: Single phase

Fuel: Diesel + Electric

Frequency (Hz): 50

Voltage (V): 230

Tank capacity (L): 10

Max rated heat power: 6000 W

Min rated heat power: 2000 W

Max Gas consumption (Kg/h): 0.46

Min Gas consumption (Kg/h): 0.16

Air flow (m³/h): 287

Length (mm): 525

Width (mm): 450

Height (mm): 300

Type of climate control: Stove for Campers

Weight (Kg): 16.8
