150,55 € tax excluded

Product description:

TRUMA WATER CONNECTION KIT AND FROST CONTROL JG

The FrostControl is an overpressure relief valve, able to operate without electricity with the function of an antifreeze thermostat. As an accessory, it can be used for Truma Boiler or Combi hot water production appliances, but also for fixed water tanks mounted in caravans and motorhomes. It can also be used as a replacement for the FrostControl supplied, depending on the type of supply, with the Truma hot water appliances

Product features:

Product type: Frost control
