## **Product description:**

### UNIMEC KIT DUMPER 400KG

Unimec's 400 kg Dumper Kit is a hydraulic tipping system designed to be mounted on a mini-transporter or other flatbed vehicle. It is used to facilitate the unloading of heavy materials such as soil, sand, gravel and construction waste.

The kit includes a hydraulic cylinder, hydraulic power pack, control unit, and tipping platform with a maximum capacity of 400 kg. The hydraulic power unit is powered by a 12-volt battery and is controlled by a wired remote control, which allows the operator to easily tip the platform and unload material.

The Unimec 400 kg Dumper Kit is easy to install and can be mounted on a wide range of mini-transporters and other flatbed vehicles. It is an economical solution for those who need to transport heavy loads and want to streamline the unloading process.

Overall, Unimec Kit Dumper 400 kg is a versatile and reliable hydraulic tipping system that can improve the efficiency and safety of material handling operations.
