Product description:

UNIMEC KIT DUMPER 700KG

Unimec offers a hydraulic dumper with a capacity of 700 kg. The Unimec dumper 700 Kg is a hydraulic tipping system designed to be mounted on a mini-transporter or other vehicle with a flatbed. It is used to facilitate the unloading of heavy materials, such as soil, sand, gravel, and construction waste.

The hydraulic dumper 700 Kg includes a hydraulic cylinder, a hydraulic power pack, a control unit, and a tipping platform with a capacity of up to 700 kg. The hydraulic power pack is powered by a 12V battery and is controlled by a wired remote control, which allows the operator to easily tip the platform and unload the material.

The Unimec dumper 700 Kg is easy to install and can be mounted on a wide range of mini-transporters and other vehicles with a flatbed. It is a cost-effective solution for those who need to transport heavy loads and want to streamline the unloading process.

Overall, the Unimec dumper 700 Kg is a reliable and efficient hydraulic tipping system that can improve the efficiency and safety of material handling operations.
