Product description:

UNIMEC ELECTRIC START GX200

One of the most interesting products offered by Unimec is the GX200 mini-transporter with electric start.

This vehicle is perfect for agricultural activities, transportation of goods, and any other activity where you need to move quickly over rough terrain.

The electric start of this mini hauler is a unique feature that makes it very convenient to use. There is no need to pull the starter cord as with other mini haulers, but just press a button to start the engine. This starting system is very useful for those who use the mini-transporter frequently or have difficulty pulling the starting rope.

The GX200 engine is one of the most important parts of this mini-transporter. It is a four-stroke engine that offers a power output of 5.5 hp. This engine is very reliable and provides excellent acceleration and top speed. In addition, due to its low noise and low emissions, this engine is environmentally friendly and makes the mini-transporter very quiet during use.

The GX200 mini-transporter with electric start is very easy to maneuver and provides great stability thanks to its four-wheel drive. The structure of the vehicle is strong and durable, able to withstand heavy and continuous use.

The GX200 electric start mini-transporter from Unimec Srl is a high-quality product that offers outstanding performance. Thanks to its electric start feature, the mini-transporter is very convenient to use and is especially suitable for those who use it frequently. In addition, the engine power and maximum load capacity make it an ideal vehicle for agricultural and heavy-duty hauling activities.

Looking for a crawler cart? Here you can find the full range of crawler trucks UNIMEC or other

specialized brands.
