

UNIMEC FG17A9 ANTI-THEFT BOX 250 Kg

Product price:

585,00 € tax excluded

Product description:

UNIMEC FG17A9 ANTI-THEFT DUMP 250 KG

UNIMEC FG17A9 is an anti-theft container with a load capacity of 250 kg, designed for the handling of materials, it prevents accidental damage to loads during transport.

The robust construction of the skip makes it ideal for use on construction sites, gardens, parks and car parks, its robust structure ensures that the load is protected against shock and vibration during transport.

UNIMEC FG17A9 is equipped with a loading surface in galvanized steel sheet resistant to corrosion and bad weather. The body structure is made of water-painted steel, which guarantees good resistance to wear and scratches. UNIMEC FG17A9 is equipped with an upper panel with an anti-burglary system, which protects the load during transport and facilitates loading and unloading.

UNIMEC FG17A9 has a compact size that makes it easy to maneuver in confined spaces. Its low weight also makes it easy to move manually, without the need for lifting equipment.

The UNIMEC FG17A9 body is supplied with a tubular steel support frame, which guarantees good stability during transport. The structure of the work container is equipped with lifting pockets and a raised support surface that allows it to be easily put on by a pallet truck or forklift or to be lifted by means of a crane, allowing you to easily transport all your equipment.

The UNIMEC FG17A9 anti-theft skip with a maximum load capacity of 250 kg is a resistant and versatile piece of equipment, which guarantees reliable protection of the transported material. The presence of the burglary-resistant top panel makes it ideal for transporting materials and equipment in different work environments, even in the presence of obstacles or confined spaces.
