Product description:

OSMOSEA NEW12 30 NAUTICAL WATERMAKER 30 LT/H

The Osmosea New12-30 watermaker is a one-piece reverse osmosis plant equipped with 1 carbon 2521 vessel, capable of supplying up to 30 lt/h of fresh water through the reverse osmosis process.

The semipermeable membrane used in the reverse osmosis process separates the salt and impurities in the seawater from the freshwater, allowing the freshwater to be collected on the opposite side of the membrane.

The Osmosea New12-30 nautical watermaker is specially designed for boats, offering constant production of fresh water thanks to its automatic control system, which regulates pressure and pump speed.

The Osmosea New12-30 watermaker's control system constantly monitors the quality of the water produced, ensuring that it is of high quality and potable. The Osmosea New12-30 watermaker is also compact and easy to install, suitable for any vessel, large or small, and requires little in the way of maintenance.
