

Water Heater RA-1011

230V 1000W

Product price:

152,00 € tax excluded

Product description:

Water heater for generator sets RA-1011

Suitable for water heating in diesel engines with closed-circuit cooling.

The heater prevents the temperature of the cooling circuit from falling below a certain value. This value is controlled by an internal thermostat. A second internal thermostat protects the unit from overheating.

Key features of the heater RA-1011

- Direct fixing, no bracket required
- Presence of a coolant drain plug
- Standard power cable 3 meters long
- Special cataphoresis coating that protects it from the glycol.
- Excellent dielectric strength
- Connections facilitated by the presence of a cable
- Temperature maintenance by internal thermostat: a second thermostat protects the apparatus from possible overheating phenomena
- Suitable for direct mounting on the motor.

Product features:

Phase: Single phase

Frequency (Hz): 50

Voltage (V): 230

Single-phase power (KW): 1

Power (W): 1000

Length (mm): 80

Width (mm): 70

Height (mm): 220

Product type: Scaldiglia

Weight (Kg): 1.1
