

AUTOCLIMA FRESCO 5000 RT VEHICULAR AIR CONDITIONER 1600W

Product price:

1.360,00 € tax excluded

Product description:

AUTOCLIMA FRESCO 5000 RT VEHICULAR AIR CONDITIONER 1600W

AUTOCLIMA FRESCO 5000 RT is a rooftop air conditioner with a cooling power of 1600W, with space-saving dimensions that allows installation even when space is limited.

Due to its space-saving dimensions, AUTOCLIMA FRESCO 5000 RT is especially suitable for vans. It can be installed on the roof even if the solar panel, dish and a luggage box are already mounted there. However, this camping rooftop air conditioner is also excellently suited for caravans and campers, as well as liners.

Autoclima Fresco 5000 RT is designed for quiet operation and low noise during use. This ensures a quiet environment inside the vehicle, allowing passengers to enjoy the journey without disturbance.

In addition, Autoclima Fresco 5000 RT is a highly energy efficient system, helping to reduce energy consumption and operating costs. This makes it a sustainable and cost-effective choice for commercial vehicle owners.

The AUTOCLIMA FRESCO 5000 RT is also equipped with an advanced air filtration system, which effectively captures harmful particles in the outdoor environment. This helps create a healthy and clean indoor environment, protecting the health and well-being of passengers.

Quick and easy installation by taking advantage of the vehicle's original hatch, a solution that ensures mounting even on roofs with high inclination. Compatible with Universal Mounting Kits for the major industrial vehicle models on the market.

AUTOCLIMA FRESCO 5000 RT has outlets that can be individually oriented so that fresh air is distributed where it is needed. Due to its very small and flat structure, the internal air distributor does not obstruct the passage in the slightest. During operation, it dehumidifies the recirculated

air, thus contributing to a pleasant room climate even with minimal temperature differences.

TECHNICAL CHARACTERISTICS AUTOCLIMA FRESCO 5000 RT

Cooling capacity: 1600 W

Input voltage: 24V

Evaporator flow rate: 650 m3/h

Cooling airflow: 5500 BTU/h

Nozzles: 3

Compressor: Rotary

Number of speeds: 6

Refrigerant: 134a

Remote control: Yes

Width: 645 mm

Length: 920 mm

Height: 280 mm

Net weight: 23 kg
