GENMAC Wonder-GAS RG10000HS NG GENERATOR 9.8KVA NATURAL GAS SINGLE-PHASE

The GENMAC Wonder-GAS RG10000HS NG single-phase generator is equipped with a Honda GX690 Methane GAS engine, capable of delivering a maximum power output of 9.8KVA, complete with **capacitor Voltage Regulator (AVR optional)**.

The GENMAC Wonder-GAS RG10000HS NG is equipped with electric start with 12 V battery, the generator is equipped with automatic panel with **Comap Intelinano Plus** control unit, which allows to display of all electrical parameters of the engine and generator, functions, states of the genset, manage the genset entirely and display, in case they occur, the errors or alarms of the system.

The Genmac Wonder-GAS RG10000HS NG generator is an efficient natural gas-fueled power source. With an output of 9.8KVA, it can provide a reliable supply of power for a wide range of single-phase applications.

This generator is particularly suitable for residential, commercial and industrial uses where natural gas is available as a fuel source. Due to its gas operation, the Genmac Wonder-GAS RG10000HS NG offers numerous advantages, including lower cost than other fuels, lower pollutant emissions, and longer operating range.

The 9.8KVA power output enables it to easily and reliably power appliances, tools and machinery with moderate energy demand. It can handle loads such as lights, refrigerators, computers, electric pumps and more. In addition, its single-phase design makes it compatible with power

supply needs in small to medium-sized domestic or commercial environments.

QUADRO DI AVVIAMENTO AUTOMATICO ATS (Optional)

The GENMAC Wonder-GAS RG10000HS NG generator has provision for connection with the ATS automatic start-up panel. Thanks to which you will no longer have to worry about blackouts because if the power grid goes out, this panel is able to automatically start the generator and allow you to continue your activity without losing your work data.
