Product description:

VITRIFRIGO C65L PORTABLE FRIDGE-FREEZERS

The VITRIFRIGO C65L is a portable and built-in fridge-freezer with LED thermostat, part of a series of appliances dedicated to both portable and fixed installations. The versatility of this series is evident through its ability to adapt to a wide range of environments, including dedicated compartments and limited spaces.

The robustness and durability of these refrigerators are evident thanks to their construction in high-strength loaded polyethylene through rotational molding. This process gives them a structural solidity that makes them suitable to withstand the challenges of the most demanding environments.

The special refrigerators of the VITRIFRIGO C65L series offer the flexibility to create custom refrigerated compartments to meet the specific needs of users. With options like the practical removable container or sliding opening, they allow optimizing available space while maintaining good internal capacity.

The digital thermostat and LED thermostat ensure precise temperature control, allowing users to easily set the optimal storage conditions for their food and beverages. Additionally, the blue LEDs used in the LED thermostat offer a quick and clear visual indication of the device's status. With the introduction of the new VITRIFRIGO C65L option, the range of refrigerators expands further, offering even more choice and adaptability to meet specific user needs.

Standard LED lighting not only contributes to reducing energy consumption but also ensures uniform illumination inside the refrigerator, facilitating the search for stored

items.

Standard handles make transporting these refrigerators a breeze, while the internal basket adds an additional level of convenience for organizing stored items. With the addition of the VITRIFRIGO C65L option, the range of available fridge-freezers expands, offering even more choice and versatility to meet specific user needs.

With an additional option like the D power, which offers a bivalent control unit compatible with various power sources, these refrigerators are even more versatile and suitable for a variety of contexts.

With a total capacity of 65 liters and a robust construction, the VITRIFRIGO C65L is the ideal choice for those seeking a reliable and efficient fridge-freezer for their storage needs, both in domestic and professional environments.

Technical Specifications VITRIFRIGO C65L:

Capacidad total litros: 65

Peso neto: 24 Kg

Alimentación: 12/24Vdc (también disponible con bivalente 12/24Vdc - 100-240Vac 50/60Hz)

Consumo nominal: 45W

Anchura total: 765 mm.

Altura total: 458 mm.

Profundidad total: 510 mm.

Rango de temperatura interna: +10°C / -20°C

Product features:

Input power (W): 12/24Vdc (also available 12/24Vdc - 100-240Vac 50/60Hz)

Length (mm): 510

Width (mm): 765

Height (mm): 458

Dry weight (Kg): 24

Product type: Portable and special installation fridge-freezers
Capacity of the refrigerator (L): 65
Nominal consumption: 45W
Internal temperature: +10°C / -20°C
