Product description:

BM2 SKID 25015 HIGH PRESSURE WASHER 250 BAR

The BM2 SKID 25015 Pressure Washer 250 bar is a professional machine designed to offer superior performance and reliability in a wide range of high-pressure cleaning applications. Equipped with a KOHLER diesel engine, specifically the LDW 1003 model with three liquid-cooled cylinders, this pressure washer ensures powerful and continuous operation, ideal for intensive use.

The BM2 SKID 25015 is equipped with a high-efficiency boiler powered electrically at 12 VDC, ensuring rapid and consistent water heating. The high-pressure pump with ceramic pistons, brass head, and by-pass valve ensures durability and long life. This configuration makes the BM2 SKID 25015 an excellent choice for those seeking an effective and durable cleaning solution.

Another significant advantage of the BM2 SKID 25015 Pressure Washer is the large water tank with a float valve, which facilitates water level control. The detergent dispensing is managed via a regulator valve, allowing precise and controlled product distribution. The pressure regulation valve is easily accessible from the outside, making it simple to adjust the pressure to specific cleaning needs.

The sheet metal tilt hoods facilitate maintenance operations, allowing quick and easy access to internal components. The electric start via battery greatly simplifies the machine's ignition, while the low noise level makes the BM2 SKID 25015 suitable for use in noise-sensitive environments.

The BM2 SKID 25015 features a single, large diesel tank for the engine and boiler, offering an operating autonomy of 3 to 6 hours, depending on use. The base is designed for forklift handling, facilitating the transport and positioning of the machine on the work site. The electrical panel with level and anomaly indicators allows constant and safe monitoring of the machine's operation.

With a maximum pressure of 250 bar (25 Mpa or 3625 psi) and a maximum flow rate of 900 liters per hour, the BM2 SKID 25015 is perfect for the most demanding cleaning tasks. The compact dimensions (1400 mm length, 1000 mm width, and 1080 mm height) and weight of 442 kg make it a robust yet manageable machine.

In conclusion, the BM2 SKID 25015 Pressure Washer is an advanced solution for high-pressure cleaning, combining power, efficiency, and practicality. Thanks to its solid construction and numerous advanced features, the BM2 SKID 25015 Pressure Washer is capable of meeting the needs of the most demanding professionals.

Technical Features BM2 SKID 25015 :

Maximum pressure: 250 bar - 25 Mpa - 3625 psi
Flow rate: 900 Lt./h
Pump: IP47
Pump speed: 1750 rpm
Motor: (type) Diesel / (mod.) KOHLER LDW 1003
Cylinders: 3 nr
Engine displacement: 1028 cm³
Max power: 19.5 hp
Fuel tank: 20 lt
Length: 1400 mm.
Width: 1000 mm.
Height: 1080 mm.
Weight: 442 kg.

Images and technical data are not binding and may be subject to revisions by the manufacturer.

Product features:

Fuel: Diesel
Engine: KOHLER LDW 1003
Starting system: Electric

Pump type: IP 47

Maximum output capacity (Lt/min): 900

Length (mm): 1400

Width (mm): 1000

Height (mm): 1080

Dry weight (Kg): 442

Pump rotation (rpm): 1750

Maximum pressure (bar-MPa-psi): 250 - 25 - 3625

Motor (cm3): 1028
