Product description:

GYS GYSPACK 750 Starter

GYS GYSPACK 750 is a 12V starter and power supply unit that can power all 12V DC electrical appliances, thanks to its internal 28 Ah battery.

GYS GYSPACK 750 is a professional autonomous starter ideal for motorbikes, cars, campers without risking the vehicle's electronics.

These are some of the strong points of the GYS GYSPACK 750 starter:

- 2 in 1: Autonomous starter for 12 V lead-acid battery and 12 V stabilised power supply.
- Instantly starts motorbikes, cars, campers, petrol and diesel engines.
- Generates a maximum starting power of 750 A (2500 A peak).
- It is an autonomous 12 V power source for all electrical appliances (TV, lamp, laptop, etc.) thanks to its internal 28 Ah battery.
- Compact and light (14 kg), it is easy to transport.
- Equipped with an assist light for working in the dark or in dangerous areas.
- Internal battery charge status indicator.

GYS GYSPACK 750 starter is equipped with a back-up light to facilitate visibility during work, and a tester; the GYS GYSPACK 750 has a display indicating the state of charge of the internal battery.

Pro equipment GYS GYSPACK 750

- Automatic 230V /12V floating battery charger: for unattended recharging of the internal battery; recharges to 100%, preserving its service life and performance; can remain permanently connected to the mains (to be charged each time after each use)
- Battery ON/OFF overvoltage protection in the connection
- Audible alarm warning of polarity reversal in case of handling error.
- Copper cables 2 x 1.30m, $\varnothing 25\text{mm}^2$ with 600 A insulated clamps.
- Equipped with 2 fuses at the rear

Technical characteristics of the GYS GYSPACK 750:

Continuous starting capacity: 1450 A

Peak starting capacity: 2500 A

Tester function: Yes

Cigarette lighter charging: EKSTERN 12V DC / 2A DC

Protections: against reverse polarity and starting current surge

Power requirement: 12 V DC

Fuse: 2x200 A

Length: 360 mm

Width: 20 mm

Height: 430 mm

Weight: 14 kg

If, on the other hand, you are looking for another product similar to the GYS GYSPACK 750 starter, then we recommend that you take a look at our entire range of GYS starters.

Product features:

Length (mm): 360

Width (mm): 200

Height (mm): 430

Product type: Starter

Protections: Against polarity reversal and current surge at start-up

Weight (Kg): 14

Fuse: 2x200 A

Lead-acid battery: 28 Ah

Continuous starting capacity (A): 1450

Peak starting capacity (A): 2500

Tester function: Yes

Power supply: 12 V DC
