## **Product description:**

GYS NOMAD POWER PRO 700 Starter

GYS NOMAD POWER PRO 700 is a high performance (92,5 Wh) portable lithium-based starter that can provide power.

GYS NOMAD POWER PRO 700 starter combines 3 functions:

- Instant start for 12 V vehicles (starting current: 600 A) cars, SUVs, hatchbacks, vans, tractors, boats, etc.
- Autonomous power supply for all types of electrical appliances and electronic devices.
- Emergency/signalling light.

Compact and very light (820 g), the GYS NOMAD POWER PRO 700 starter slips easily into the glove compartment.

GYS NOMAD POWER PRO 700 is a starter equipped with 2 USB ports and a 15V - 10A output port ideal to power a 12V electrical device.

Furthermore, the GYS NOMAD POWER PRO 700 starter is equipped with charge indicators and includes all the necessary protections for safe starting (short-circuit protection, reverse polarity protection).

The lithium battery of the GYS NOMAD POWER PRO 700 starter gives it an exceptional power-to-size ratio (starting intensity: 600 A). This GYS model allows you to start vehicles equipped with a discharged 12V battery (liquid, gel, AGM, Start&Stop) in a few seconds (do not start LiFePO4 lithium batteries with this booster, the battery voltages are not compatible).

## **Pro equipment**

- Automatic 230V /12V floating battery charger: for unattended recharging of the internal battery; recharges the battery to 100%, preserving its service life and performance; can remain permanently connected to the mains (to be charged each time after each use)

- Battery ON/OFF overvoltage protection in the connection
- Audible alarm warning of polarity reversal in case of handling error.
- Copper cables 2 x 1.30m,  $\varnothing 25\text{mm}^2$  with 600 A insulated clamps.
- Equipped with 2 fuses at the rear

**Technical characteristics of the GYS NOMAD POWER PRO 700:**

Capacity per cell: 6 Ah 92.5 Wh

Full charge: 9 hours

Continuous starting capacity: 1500 A

Peak starting capacity: 2000 A

Energy J 3s: 14000 J

Smart starter cable: Yes

Cables: USB-C / MICRO USB Type B

Input: Type C 5V - 3A

Output: Type C / 5V - 2.1A / 5/9/12V - 2A / 15V 10A

Powerbank: Yes

LED light: Light / SOS / SPOT

Length: 228 mm

Width: 100 mm

Height: 38 mm

Weight: 0.82 Kg

If, on the other hand, you are looking for another product similar to the GYS NOMAD POWER PRO 700 starter, then we recommend that you take a look at our entire range of starters.

**Product features:**

Length (mm): 228

Width (mm): 700

Height (mm): 38

Product type: Starter

Weight (Kg): 0.82

Inputs: Type C 5V - 3A

Outputs: Type C / 5V - 2.1A / 5/9/12V - 2A / 15V 10A

Continuous starting capacity (A): 1500

Peak starting capacity (A): 2000

Full charge (h): 9

Capacity per cell: 6 Ah 92.5 Wh

Energy 3s (J): 14000

Smart cable: Yes

Cables: USB-C / MICRO USB Type B
