Product description:

FENZI G7 IRON TANK FOR DIESEL FUEL 710LT

The FENZI G7 Iron Fuel Diesel Tank 710LT is a high-quality and safe product, designed specifically for transporting hazardous and flammable liquids such as diesel. Made of EN 10025 S235JR carbon steel, the FENZI G7 ensures durability and complies with stringent European regulations.

Approved by the Ministry of Infrastructure and Transport according to ADR regulations, the FENZI G7 tank is certified for transporting hazardous materials. Each unit undergoes rigorous checks to meet high safety standards.

One of the distinctive features of the FENZI G7 Iron Tank is its double-effect safety valve, designed to prevent content leakage even in case of vehicle rollover, providing additional protection during transport.

Additionally, to facilitate refueling operations, the FENZI G7 can be equipped with a complete pump, hose, and nozzle.

Its cylindrical shape is enclosed in a robust parallelepiped-shaped metal structure. The external coating ensures effective corrosion protection, ensuring long-lasting durability even in harsh environments.

Furthermore, the FENZI G7 includes a fusible plug and inspection flange to ease maintenance and internal inspection. Designed with baffles to control liquid inertia during transport, despite its specific 710-liter capacity.

Models:

-G7 F45/12
-G7 F70/12

The only difference between G7 F45/12 and G7 F70/12 models is the dispensing power: F45 offers lower dispensing power, while F70 is designed for higher power, meeting various operational needs while maintaining the high quality and reliability typical of FENZI products.

Other features include lifting eyes and bottom lifting points, facilitating tank handling operations. Cross fittings allow efficient use of space, especially during transport and storage. Each tank is equipped with an identification plate and comes with a user manual, maintenance guide, and certification from the testing authority confirming product compliance.

The FENZI G7 Iron Diesel Tank is the ideal solution for those seeking a safe, durable, and compliant container for diesel transport. With high-quality materials, precise design, and advanced safety systems, the FENZI G7 stands out as a reliable and long-lasting product, perfect for meeting fuel transport needs.

Technical specifications of FENZI G7 Iron Tank:

Capacity: 710 liters
Width: 920 mm
Length: 1890 mm
Height: 1150 mm
Weight: 215 kg
