### CGM 100B Three-Phase Generator 400v 110KVA 120LT

**CGM Generator set Three-Phase 400v 110KVA 120LT** is a powerful and reliable solution for three-phase power needs, designed to provide continuous or emergency power in a variety of applications. With a **maximum three-phase power of 110 KVA (88 KW)**, this generator set is capable of handling high loads and ensuring operational continuity in critical situations.

The heart of this generator is a **Baudouin 4M11G120/5** engine, a robust and reliable 4-cylinder diesel engine with a displacement of 4500 cm<sup>3</sup> and a bore x stroke of 105 x 130 mm. The engine is water-cooled and equipped with an electronic speed governor for optimal stability. The electric start facilitates the generator set's ignition, while the 1500 rpm ensures efficient operation.

The alternator, available in **STAMFORD, MECC ALTE or MARELLI MOTORI** variants, guarantees stable and high-quality power production. The AVR (Automatic Voltage Regulator) voltage regulator maintains the voltage at 400V, with a frequency of 50Hz, ideal for industrial and commercial applications.

The **120-liter fuel tank** offers an autonomy of approximately 7 hours with a consumption of 23 liters per hour at 100% load. The silenced version of the generator set keeps the sound pressure at 69 dB(A) at 7 meters, making it suitable even for noise-sensitive environments.

The **compact dimensions** (2500 x 1050 x 1590 mm) and the **weight of 1525 kg** facilitate installation and transport. The optional ATS (Automatic Transfer Switch) switch panel allows automatic switching to emergency power in case of power failure.
