Product description:

TECNOGEN AUTOMATIC SWITCHBOARD ACP7320STS - 400V 30KVA 40A

TECNOGEN automatic switchboard ACP7320STS is an electronic device that enables automatic management of a genset. The TECNOGEN switchboard is equipped with an electronic control unit 7320 that detects the failure and automatically starts the genset. The genset then supplies power to the plant until the grid is restored.

TECNOGEN framework ACP7320STS is available in different versions, depending on the genset power and supply voltage. The 400V 30KVA 40A version, for example, is designed for a 30 kVA genset operating at a voltage of 400 V.

TECNOGEN quadro is equipped with an LCD display that shows information about the operation of the genset, such as voltage, frequency, and time of operation. The display is also used to configure the panel settings.

TECNOGEN automatic switchboard ACP7320STS is an essential device for ensuring continuity of power supply in the event of a power failure. It is particularly suitable for critical applications, such as hospitals, industries and shopping malls.

Main features of TECNOGEN automatic switchboard ACP7320STS

Automatic genset management

Continuity of power supply in case of power failure

Critical applications, such as hospitals, industries and shopping malls

Benefits TECNOGEN ACP7320STS

Ensures continuity of power supply

Easy to use

Robust and reliable

The TECNOGEN ACP 7320 STS automatic switchboard is an investment that will let you sleep soundly, knowing that your facility is protected in the event of a power failure.

The ACP 7320 STS switchboard is the ideal solution for ensuring the continuity of operation of your critical activities.

The TECNOGEN ACP7320STS automatic switchboard is an excellent solution for ensuring power continuity in the event of a power failure.

The ACP 7320 STS switchboard is easy to use and configure, thanks to its LCD display and intuitive menu.

The TECNOGEN ACP7320STS switchboard is robust and reliable, thanks to its durable material construction.
