## Product description:

MASE MARINER2400 SINGLE-PHASE MARINE GENERATOR 26KW

MASE MARINER2400 single phase marine generator is equipped with a YANMAR 4TNV98 diesel engine capable of delivering a maximum power of 26 KW complete with **AVR voltage regulator**.

The MASE MARINER2400 marine generator is built with and air-cooled, self-excited synchronous alternator, it is extremely compact and powerful, suitable for small boats as well.

The alternator of the MASE MARINER2400 is synchronous 4-pole, self-regulated, self-excited, brushless, which in conjunction with the powerful YANMAR engine can deliver a maximum power of 26KW. The rotor and the stator are coated with epoxy paint to prevent the attack of atmospheric agents, in addition it is equipped with safety systems of auto stop in case of high temperatures detected on the windings.

The MASE MARINER2400 is built with synchronous alternator, self-excited without brushes with air cooling, it is extremely compact and powerful, suitable also for small boats. The alternator is complete with AVR voltage regulator that ensures the stability of the voltage delivered by the generator, delivering current like the one at home.
