

HYUNDAI KIT ATS PER GENERATORI MONOFASE DHY6000 LEK, DHY6000 SE E DHY8000 SE

Product price:

304,02 € tax excluded

Product description:

The ATS automatic intervention panel connected to the electrical network, in the event of a power failure, starts the generator in a completely autonomous way by re-supplying power to the line that suffered the blackout. When the electricity returns, the ATS device returns to function and automatically switches off the generator, returning it to the stand-by phase and ready to intervene again.

Equipment included:

15 meters of cable to connect the ATS included.
