

FINI COMPRESSOR PLUS 56-08 VS

Product price:

23,849.10 € tax excluded

Product description:

Rotary screw compressor with oil-injected belt drive.
Variable speed version.

High energy savings

High-efficiency IE3 motors, combined with high-performance airends, help reduce energy costs. Furthermore, IE3 motors reduce CO2 emissions: an important contribution to environmental protection.

Plug & Play

Micro and Plus compressors are fully factory-tested so they can be supplied ready for immediate use, saving time and installation costs.

Low noise levels

Micro and Plus compressors are very quiet: the use of efficient soundproofing materials makes them suitable for installation even close to the workstation.

High reliability

Quality control and the use of components from world-leading manufacturers guarantee a long operating life and long maintenance intervals.

High productivity

Producing a product that ensures high performance is of fundamental importance for Fini right from the design phase. The Micro and Plus ranges also follow this philosophy.

Compact design

The extremely compact design of these compressors allows for installation near any work environment.

Product features:

Net power (kW): 55

Pressure (bars): 7.5

Air output max-min (L/min): 9300 - 3700

BSP: 2"

Acoustic pressure: 70 dB(A)

Length (mm): 1100

Width (mm): 1800

Height (mm): 2150

Dry weight (Kg): 1686
