Product description:

GS series is a suitable practical solution meeting all the needs of manual handling. The GS PRO pallet truck is equipped as a standard with a start and exit roller and a more ergonomic handle.

Maximum pressure valve

When the maximum load capacity is exceeded, oil pressure exceeds its maximum limit and the valve automatically locks the forks. Thus possible structural damage is avoided.

Varnishing

Following an appropriate conditioning operation the frame is varnished with polyester powder at a temperature of 250° to guarantee maximum resistance to wear and atmospheric agents.
