TF NM 9 are lighting towers without a built-in generating set, ideal for direct connection to the grid or for those who have their own generator.

Indeed, the frame is set up to be coupled with generating sets from 8 to 20 kVA.

The different types of bulbs available ensure great versatility of use in any working environment.

Thanks to the set-up on a slow trailer, they can be easily towed for handling on sites.

Sectors of use: rental, events, roadworks and construction sites.
