

LARIUS - Standard airless nozzle various sizes

Product price:

34,00 € tax excluded

Product description:

LARIUS - Standard airless nozzle various sizes

Standard Airless nozzle, compatible with all Airless guns, with diameter and spray angle of your choice, no extra charge.

See diagram in description to see available sizes.

Airless paint spray nozzles are adaptable to Base Mist clean for Air Mixing spraying.

The working pressure on the high-pressure spray gun, and abrasive materials over time wear out the sa paint spray nozzle, decreasing its spray fan width and requiring more passes to finish the job with more wasted time and paint.

Immediate replacement of the worn high-pressure paint spray nozzle is recommended as it may exceed the maximum capacity of your professional airless sprayer.

Compatible with all airless spray guns.

Please note that the minimum purchase amount is €200 + VAT.

If this value cannot be reached, a handling fee of 35€ + VAT will be applied
