

TELECO TELAIR ACTIVSAT 65 TWIN Automatic portable satellite antenna LNB TWIN

Product price:

880,00 € tax excluded

Product description:

TELECO TELAIR ACTIVSAT65T TWIN LNB

TELECO TELAIR ACTIVSAT65T TWIN LNB is a fully automatic portable satellite antenna. With ACTIVSAT65T TWIN LNB you can park your caravan or motorhome under the shade of the trees and easily place the automatic ACTIVSAT system on the adjacent lawn.

With the TELECO TELAIR satellite antenna ACTIVSAT65T TWIN LNB it is sufficient to take and open the tripod, mount the motor unit on its top, insert the satellite antenna and connect the cable (15 m) to the external Activsat socket of the vehicle.

Installation is really quick and easy and does not require additional tools.

The antenna will aim the satellite in a few seconds, either via Bluetooth, using your smartphone, or by simply pressing a button in the control unit inside the caravan.

The TELECO TELAIR antenna ACTIVSAT65T TWIN LNB gives you the possibility to enter the quick search mode, in this mode the dish limits the search to only 120° and, besides being much faster, it saves 70% of battery power.

In order to use the Quick Search mode it is necessary to first point the dish in the SOUTH direction. If you are not able to find the SOUTH direction, you can disable the Quick Search and the System will automatically perform the Total Search on 360°.

Each time ACTIVSAT points at a satellite, this position is saved in the system memory and allows you to further reduce the time of the next search.

If someone cuts the cable, a very loud beep is emitted and you can automatically turn on an external light (optional).

The outdoor satellite unit is closely linked to its indoor control unit via the Serial Number. All SNs are registered in a Teleco Data Base and, if someone steals the outdoor unit, he will not be able

to have any control unit, as a spare part, without providing the SN of the outdoor unit and his Name !
