Product description:

TELECO VOYAGER DIGIMATIC50 ANTENNA SETELLITARE 50cm

TELECO VOYAGER DIGIMATIC50 is a satellite antenna equipped with an electronic elevation measurer that allows the user to manually point the desired satellite with a few simple and fast maneuvers.

Currently, the main difficulty in pointing to a satellite transmitting digital TV signals is linked to the fact that the digital signals are displayed on the TV screen with a certain delay in addition to the latency of LCD TVs and therefore the user is forced to make the pointing with very slow movements in order not to risk passing in front of the satellite without noticing it.

The TELECO VOYAGER DIGIMATIC50 is the solution to this problem. In fact, it is equipped with an electronic elevation meter that provides on the display the real absolute value of the inclination of the dish, even with the vehicle not level.

The DSF90E/HD that is included indicates (directly) both the elevation and the signal strength. This allows you to quickly point this manual dish system at the desired satellite without the disadvantages of delay.

The TELECO VOYAGER DIGIMATIC50 has the transmission capabilities managed by the geostationary reference satellite located at 13 degrees East which ensures a wide coverage originating in Central Europe.

TELECO VOYAGER DIGIMATIC50 has a directly proportional correlation between its diameter and the signal strength at the edge of the "footprint".

Tendentially it is not recommended to install an antenna with an excessively large diameter on a motorhome, which is why the standard is around 80 cm in diameter.

The coverage thanks to the TELECO satellite antenna is very wide starting from the center of Europe. The signal degrades away from the center of Europe. As you can see in the map with

TELECO VOYAGER DIGIMATIC50 you can receive the signal of HotBird (which transmits SKY and TIVUSAT) practically throughout Europe, the north of Morocco, Algeria, Tunisia giving you satellite coverage in any place you decide to stay.

THE TECHNICAL FEATURES TELECO VOYAGER DIGIMATIC50

Type of orientation: Manual
Type of attachment: Wall bracket
Antenna diameter: 500 mm
Bracket size: 33 cm, 52 cm
Pointing kit: DSF90E/HD
Length: 500 mm
Width: 40 mm
Height: 500 mm
Weight: 6.7 kg

Looking for a product with different features? Here you can find the full range of TELECO and other specialized brands.

Product features:

Diameter (Ø): 50 cm
Length closed (mm): 650
Width closed (mm): 500
Height closed (mm): 170
Length (mm): 400
Width (mm): 500
Height (mm): 500
Type of coupling head: Wall bracket
Product type: Satellite Antenna
Antenna orientation: Manual
Satellites Number: 8
Weight (Kg): 6.7
