GENERATOR GENMAC G6000ATS SINGLEPHASE WITH AVR

The generator Genmac G6000ATS singlephase is powered by a gasoline engine and can deliver a maximum power of 6KW, including AVR.

The 6KW singlephase generator is equipped with high quality components, it is lightweight, compact, with a modern design and very easy to transport. The 5KW singlephase generator is equipped with a manual rope starter.

The 6KW singlephase generator has been specially developed for camping, caravans, houses, and hobby applications, etc., for this reason it reflects the peculiar features and comfort that allow its reliability and comfort in the fields of application.

The standard equipment on the Genmac G6000ATS generator includes a convenient **counter**, **tank** for great autonomy and **IP23 rain protection**, to use it also in case of bad weather.

## The advantages of AVR voltage regulator

The automatic voltage regulator, or **AVR** allows the Genmac 6KW singlephase generator to deliver stable energy and therefore be able to connect equipment with delicate electronics such as computers, appliances, smartphones and tablets: the generator set is therefore ideal for home use, camping, hobby and leisure, but also for construction sites and craftsmen.

The AVR voltage regulator and the other quality standard of the alternator with copper windings will provide you with secure and stabilized energy.
