## Product description:

MARINE GENERATOR FISCHER PANDA AGT-DC4000 24V SUPERSILENCED 3.2 KW

Generator for boats Fischer Panda AGT-DC4000 24V single phase 3.2 KW, also called marine generator, with variable speed motor from 2400 rpm to 3000 rpm. The Fischer Panda AGT-DC4000 24V marine generator is designed with a soundproof cabin that makes it **super-silent**. The Fischer Panda AGT-DC4000 24V marine generator is built with a Kubota diesel-powered engine. The Fischer Panda AGT-DC4000 24V marine generator alternator is 2-pole and has H insulation class. With its compact size and low weight, the Fischer Panda AGT-DC4000 24V marine generator is also suitable for installation on small boats.

## Hybrid AC energy - indirect AC

Battery charging generators produce direct current and generally function as part of a hybrid power supply system. Battery levels are monitored and charged automatically by the generator. An inverter supplies power to the on-board 230 V consumers. These systems are ideal for typically variable power requirements that do not require a generator to operate constantly during the day.

Ideal for systems where the generator runs for short intervals to charge the power bank and support peak power periods.

In this version, the charging voltage is controlled by an integrated AGT controller that regulates engine revs.

The engine revs can therefore be variable to achieve the required performance. However, when installing this version, the batteries must be positioned close to the generator.

- Designed for DC-AC power systems with battery plus inverter
- The generator is required to operate intermittently only
- Optimum use of the generator

- High degree of efficiency
- Compact design
- Reduced fuel consumption
