

## GENERATORS / AEGE 6501T

The semi-silent petrol AEGE 6501T generator is equipped with a three-phase alternator with neutral available, THD (total harmonic distortion) value less than 6% and voltage accuracy between +1.5% and -1.5%.

**The starting capability is 2 times the rated current.**

### **Connection**

**three-phase 380 V** = N.1 CE socket, 16A three-phase 3P+N+E for full power

**single-phase 220 V** = N.1 SCHUKO socket 16A for 33% power

**12 V DC** = 2 screw type banana plugs one red (+) and one black (-)

### **Protections**

4P differential magneto-thermal main switch.

10A fast fuse on the 12 V DC.

### **Reading instrument**

Digital voltmeter for reading voltage

### **Regulations**

Can be connected to a user with certification required

### **Recommended use**

Powerful electrical equipment, appliances and lighting that do not tolerate voltage variations between no load and full load and require a consistent voltage level.

### **Safe use**

Before use, check the electrical requirements of the user and the maximum starting current of the loads with particular attention to the single-phase power source.
