

PRAMAC LIFTER SCALE TRUCK PX20

Product description:

The scale trucks range are equipped with a functional and precise weighing device with several operating options, suitable for lifting heavy loads.

Display

The PX20 pallet truck is a simple, economical and robust tool to be used for the weighing of transported loads. Its large-sized LCD display allows for easy reading of weight and the setting of tare simply and immediately.

Frame structure

The structure is made up of a double frame and a lower fork on which a counter fork is placed; both forks house four load cells that allow for a uniform load distribution, thus keeping weighing precision even in case of collision and unbalanced load.
